

# 2025 NFES field trip – Tabernas, Spain

**Time:** 18.-22. September 2025

**Fly to Malaga/Alicante, Car rental, Drive to Carboneras**

**Max 16** participants

**Cost: Max 16000 NOK** per person, NFES will sponsor 2000 NOK for members in good standing (paid membership 2024 and 2025)

**Guide: Prof. Cesar Viseras**, University of Granada

**Sign-up** will be announced mid-May in an e-mail.

## **Brief summary:**

**Friday/Saturday** (Tabernas/Sorbas/Nijar basins), in the Almeria area. Shallow marine environment (beach-island barrier systems, reef complexes), deep marine environment (deep sea fan systems, submarine canyons, turbidite megabeds) and the fascinating world of sedimentation related to the Messinian Salinity Crisis (MSC) event.

**Sunday** (Guadix basin), excellent outcrop analogs of fluvial, delta, mixed platform and continental limestone reservoirs.

## **Monday – explore Granada, culture & history**

**Cesar Viseras** was born and raised in the area – he will show us and talk about local history & culture as well as the geology of the area.
