

FIGURE

Integration of AMG, UDAR and HR ultrasonic image. Displaying curves from bottom to top: depth, resistivity, neutron vs density, clay volume, completion zone, C2/iC4 ratio, fluid saturation index, water saturation index, fluid density prediction, GOR prediction, amplitude zones, HR ultrasonic image with gamma ray, faulted intervals, C2/iC4 ratio, water saturation index, bedding stereonet, fracture density, fault depths and Geosteer model.
